ABOUT

Weighly helps people understand their weight instead of reacting to it. It shows the true trend behind daily ups and downs, forecasts the date a goal will be reached and explains progress in plain words with an AI coach that runs entirely on the device. Progress photos, intermittent fasting, widgets and an Apple Watch app are built in. No account and no ads.

Weighly works for losing weight, maintaining a range or gaining weight, and is designed and built by GladeX, an independent product studio from Ukraine.

KEY FEATURES

- True weight trend that filters out daily water swings
- Goal date forecast from the real pace, with a range
- On-device AI coach with charts in its answers
- Progress photos with a before and after slider
- Intermittent fasting with Live Activity and Dynamic Island
- Plateau help with one small step to try each week
- Milestones every 5% and share cards that keep weight private
- Water, steps and food from Apple Health, calorie target, BMI
- Apple Watch app, widgets, Siri and Spotlight
- No account, Face ID lock, iCloud sync, CSV import, PDF report

BRAND

Weighly, one word, capital W  Indigo #4B3FBF  Paper #F4F3EF  Ink #141416

The AI coach requires Apple Intelligence and is available only on supported devices, in supported languages and regions. Everything else in Weighly works on any supported device. All screenshots show the real app. The assets in this kit are free to use in editorial coverage of Weighly.
